Part I: Platform Overview

1. Welcome & Platform Architecture

NotarDex is a comprehensive Ohio-based Remote Online Notarization (RON) and document services platform built with React 18, TypeScript, Vite 5, and Tailwind CSS, powered by Lovable Cloud (Supabase) for authentication, database, storage, and edge functions.

The platform serves three user roles with distinct access levels:

Role	Access Level	Key Capabilities
Client (Default)	Authenticated	Book appointments, upload documents, track status, use AI tools, manage payments
Notary	requireAdmin	All client features + admin dashboard, appointments, journal, documents, chat
Admin	adminOnly	Full platform control including users, revenue, settings, team, services, CRM, compliance

Complete Route Map (87 Pages)

Public Routes (35)

Route	Page	Access	Description
/	Homepage	Public	Hero, services, testimonials, FAQs, AI assistant
/services	Services Catalog	Public	14 categories, 40+ services with search
/services/:id	Service Detail	Public	Individual service info, prep checklist, CTA
/book	Book Appointment	Public	4-step booking wizard
/about	About Us	Public	Company information and team
/ron-info	RON Information	Public	Remote notarization educational page
/ron-check	RON Eligibility	Public	Document eligibility checker
/loan-signing	Loan Signing	Public	Specialized loan signing services
/notary-guide	Notary Guide	Public	Step-by-step notarization guide
/notary-guide-process	Process Guide	Public	Detailed process walkthrough
/notary-certificates	Certificates Ref	Public	Ohio notary certificate types
/fee-calculator	Fee Calculator	Public	Real-time pricing engine
/verify/:id	E-Seal Verifier	Public	Verify notarized document authenticity
/templates	Templates Library	Public	Document templates
/terms	Terms & Privacy	Public	Legal terms and privacy policy
/compliance	Compliance	Public	Ohio RON compliance information
/security	Security	Public	Platform security details
/resources	Resources	Public	Educational resources and guides
/help	Help & Support	Public	Help center and FAQs
/signer-rights	Signer Rights	Public	Signer rights information
/join	Join Platform	Public	Notary recruitment page

/pricing	Pricing Plans	Public	Subscription plan comparison
/solutions/notaries	For Notaries	Public	Notary-specific solutions
/solutions/hospitals	For Hospitals	Public	Healthcare solutions
/solutions/real-estate	For Real Estate	Public	Real estate solutions
/solutions/law-firms	For Law Firms	Public	Legal industry solutions
/solutions/small-business	For Small Business	Public	SMB solutions
/solutions/individuals	For Individuals	Public	Individual client solutions
/track/:token	Session Tracker	Public	Track appointment status
/reschedule/:id	Reschedule	Public	Reschedule existing appointment
/login	Login	Public	User authentication
/signup	Sign Up	Public	New account registration
/reset-password	Reset Password	Public	Password recovery
/unsubscribe	Unsubscribe	Public	Email unsubscribe
/maintenance	Maintenance	Public	Maintenance mode page

Authenticated Routes (20)

Route	Page	Access	Description
/portal	Client Portal	Auth	14-tab client dashboard
/business-portal	Business Portal	Auth	Organization management
/confirmation	Appt Confirmation	Auth	Booking confirmation
/ron-session	RON Session	Auth	Live notarization session
/digitize	Document Digitize	Auth	PDF/OCR processing
/request	Service Request	Auth	Intake-only service form
/mailroom	Virtual Mailroom	Auth	Document mail management
/subscribe	Subscription Plans	Auth	Plan purchase
/verify-id	Identity Verify	Auth	KYC/ID verification
/mobile-upload	Mobile Upload	Auth	QR-based doc upload
/builder	Document Builder	Auth	Template-based doc creation
/ai-writer	AI Writer	Auth	AI content generation
/ai-extractors	AI Extractors	Auth	Document data extraction
/ai-knowledge	AI Knowledge	Auth	Knowledge base Q&A
/ai-tools	AI Tools Hub	Auth	56-tool AI suite
/signature-generator	Signature Gen	Auth	Digital signature creation
/grants	Grant Dashboard	Auth	Grant writing tools
/resume-builder	Resume Builder	Auth	Resume creation
/docudex	DocuDex Editor	Auth	Full document editor
/account-settings	Account Settings	Auth	Profile management

Admin Routes (34)

Route	Page	Access	Description
/admin	Overview	Admin/ Notary	Dashboard stats, charts, recent activity
/admin/appointments	Appointments	Admin/ Notary	Full appointment management
/admin/clients	Clients	Admin/ Notary	Client profiles and history
/admin/documents	Documents	Admin/ Notary	Document management and review
/admin/journal	Journal	Admin/ Notary	Notary journal entries
/admin/availability	Availability	Admin Only	Schedule/slot management
/admin/revenue	Revenue	Admin Only	Financial dashboard
/admin/settings	Settings	Admin Only	Platform configuration
/admin/templates	Templates	Admin Only	Form/template library

/admin/apostille	Apostille	Admin Only	Apostille request tracking
/admin/chat	Live Chat	Admin Only	Client messaging
/admin/business-clients	Business Clients	Admin Only	B2B client management
/admin/services	Services Editor	Admin Only	Service catalog CRUD
/admin/resources	Resources	Admin Only	Resource management
/admin/ai-assistant	AI Assistant	Admin Only	Admin AI helper
/admin/audit-log	Audit Log	Admin Only	Activity audit trail
/admin/team	Team	Admin Only	Staff and notary management
/admin/email-management	Email Mgmt	Admin Only	IONOS email integration
/admin/leads	Lead Portal	Admin Only	5-stage lead pipeline
/admin/users	Users	Admin Only	User role management
/admin/service-requests	Service Requests	Admin Only	Intake request queue
/admin/content-workspace	Content	Admin Only	Blog/content creation
/admin/task-queue	Task Queue	Admin Only	Assignment management
/admin/crm	CRM Hub	Admin Only	7-stage Kanban pipeline
/admin/build-tracker	Build Tracker	Admin Only	Dev progress tracking
/admin/docudex-pro	DocuDex Pro	Admin Only	Advanced doc editing
/admin/process-flows	Process Flows	Admin Only	Workflow visualization
/admin/integrations	Integrations	Admin Only	API integration tests
/admin/client-emails	Client Emails	Admin Only	Per-client email history
/admin/mailbox	Mailbox	Admin Only	IONOS IMAP sync
/admin/webhooks	Webhooks	Admin Only	Webhook management
/admin/performance	Performance	Admin Only	KPI metrics
/admin/compliance-report	Compliance	Admin Only	Monthly compliance reports
/admin/automated-emails	Auto Emails	Admin Only	Email automation

2. Getting Started

Account Creation

1. Navigate to /signup to create a new account.
2. Enter your full name, email address, and a strong password (minimum 8 characters).
3. Check your email inbox for a verification link. Click the link to confirm your account.
4. Once verified, log in at /login with your credentials.

> ℹ *Email verification is required before accessing protected features. An unverified banner will display until confirmed.*

Password Reset

1. Click 'Forgot password?' on the login page to navigate to /reset-password.
2. Enter your registered email address and submit.
3. Check your email for a password reset link with a one-time token.
4. Click the link and enter your new password.

Multi-Factor Authentication (MFA)

MFA setup is available via the Account Settings page (/account-settings). The platform supports TOTP-based authentication using apps like Google Authenticator or Authy.

Cookie Consent

A GDPR-compliant cookie consent banner appears on first visit. Users can accept or decline non-essential cookies. Preference is stored in localStorage.

Part II: Public-Facing Pages

3. Homepage & Navigation

The homepage (/) features a full-width hero section with animated phone mockup, a 'What Do I Need?' AI-powered assistant that helps visitors identify which service they need, followed by service category cards, customer testimonials with star ratings, and a comprehensive FAQ accordion.

Navigation Structure

The responsive navbar includes the following dropdown menus:

Menu	Items
Services	All Services, Loan Signing, RON Info, Notary Guide, Fee Calculator
Solutions	For Notaries, Hospitals, Real Estate, Law Firms, Small Business, Individuals
Tools	AI Tools Hub, AI Writer, DocuDex Editor, Document Builder, Templates, Signature Generator
Resources	Resources, Help & Support, Signer Rights, Compliance, Security, About

On mobile, the navbar collapses into a hamburger menu with a sheet-based slide-out panel.

View Homepage

4. Services Catalog

The Services page (/services) displays all available services organized into 14 categories. Each service card shows its name, brief description, pricing information (with appropriate suffixes like /seal, /doc, /page, /hr), and a CTA button.

Service Categories (14)

Category	Description	Example Services
Core Notarization	RON, in-person, witness, certified copies	Remote Online Notarization, Mobile Notary, Witness Services
Identity & Verification	ID checks, I-9 verification	ID Verification / KYC, I-9 Employment Verification
Document Services	Prep, PDF processing, scanning	Document Preparation, PDF Services, Document Digitization
Authentication & Intl	Apostille, consular, translation	Apostille Facilitation, Consular Legalization Prep
Business & Volume	Bulk packages, APIs, partners	Business Subscription Plans, API Services, White-Label
Recurring & Value-Add	Storage, mailroom, reminders	Secure Document Vault, Virtual Mailroom, Automated Reminders
Consulting & Training	RON onboarding, workflow audits	RON Platform Onboarding, Workflow Automation Consulting
Business Services	Email mgmt, correspondence	Email Management, Correspondence Handling
Admin Support	Data entry, travel, general admin	Data Entry, Travel Arrangements
Content Creation	Blog, social media, newsletters	Blog Post Writing, Social Media Content, Newsletter Design
Research	Market analysis, lead gen	Market Research Report, Lead Generation
Customer Service	Email support, live chat	Email Support Handling, Live Chat Support

Technical Support	Website updates, content mgmt	Website Content Updates
User Experience	UX audits, usability testing	UX Audit, User Flow Testing, Usability Testing

Service Routing Logic

Services follow different routing paths based on their type:

Service Type	CTA Action	Example
Bookable (Notarization)	Opens booking wizard at /book	Remote Online Notarization
Intake-Only	Opens service request form at /request	Apostille Facilitation, Data Entry
SaaS Tool	Redirects to tool page	Document Storage → /portal, PDF Services → /digitize
Subscription	Redirects to /subscribe	Business Subscription Plans
Portal Service	Redirects to /portal	Secure Document Vault

View Services

5. Solution Pages

Six industry-specific landing pages tailor messaging to different customer segments:

Page	Route	Key Focus
For Notaries	/solutions/notaries	Commission management, RON platform, journal tools, CE tracking
For Hospitals	/solutions/hospitals	HIPAA-aware notarization, bedside signings, compliance documentation
For Real Estate	/solutions/real-estate	Loan signing services, title company integration, closing docs
For Law Firms	/solutions/law-firms	Deposition oaths, affidavit jurats, legal document prep
For Small Business	/solutions/small-business	Entity formation docs, employee onboarding, contracts
For Individuals	/solutions/individuals	Powers of attorney, wills, personal document notarization

6. Public Tools

Fee Calculator (/fee-calculator)

Real-time pricing engine powered by src/lib/pricingEngine.ts. Calculates notarization fees based on service type, document count, page count, signer count, appointment type (in-person vs RON), travel distance, and after-hours scheduling. Includes Ohio statutory fee limits and travel fee tiers.

RON Eligibility Checker (/ron-check)

Interactive questionnaire that determines whether a document is eligible for Remote Online Notarization under Ohio ORC §147.64-66. Checks document type, signer location, identification requirements, and notarial act type.

E-Seal Verifier (/verify/:id)

Validates the authenticity of a notarized document by looking up the e-seal verification record in the database. Displays notary name, document name, notarization date, commissioned state, signer name, and verification status.

Notary Certificates Reference (/notary-certificates)

Reference guide showing all Ohio notary certificate types: Acknowledgment, Jurat, Copy Certification, Oath/Affirmation, and Signature Witnessing with exact statutory language.

Part III: Booking & Appointment Flow

7. Booking Wizard

The 4-step booking wizard at /book guides users through scheduling a notarization or document service appointment.

Step 1: Service Selection

Users select from available services. The system filters by bookable services (excludes intake-only and SaaS tool services). Category-specific intake fields appear dynamically:

Service Category	Additional Fields
Apostille	Destination country, document description, document count
Real Estate	Property address, entity name
I-9 Employment	Employer name, employee count
Loan Signing	Lender name, loan type, document package
General Notarization	Document type, signer count, notarization type

Step 2: Schedule Selection

Calendar-based date picker showing available slots. Slots are determined by the admin availability configuration (/admin/availability). After-hours appointments (before 9 AM or after 5 PM) incur additional fees calculated by the pricing engine.

Step 3: Signer Information

Collects signer details including full name, email, phone, and address. Guest users can sign up during this step. Existing authenticated users have their profile data pre-filled.

Step 4: Review & Confirm

Final review showing all appointment details, pricing breakdown (base fee + travel + after-hours + document count), and payment processing via Stripe. Confirmation generates a unique confirmation number in the format NTR-YYYYMMDD-XXXXXX.

> ℹ *Booking drafts are auto-saved to the database (booking_drafts table) so users can resume if they leave mid-process.*

8. Appointment Confirmation

After successful booking, the /confirmation page displays:

- Unique confirmation number (NTR-YYYYMMDD-XXXXXX)
- Appointment date, time, and service type
- Calendar download button (.ics file)
- Reschedule link (/reschedule/:confirmationNumber)
- Session tracking link (/track/:token)

Email Notifications

The send-appointment-emails edge function dispatches notifications:

Email Type	Trigger	Content

Confirmation	Booking completed	Appointment details, confirmation number, prep checklist
Reminder (24hr)	Scheduled cron	Upcoming appointment reminder with join link
Reminder (1hr)	Scheduled cron	Final reminder with document checklist
Reschedule	Client reschedules	Updated date/time, new confirmation
Cancellation	Client or admin cancels	Cancellation confirmation, refund info

Part IV: RON Session Workflow

9. RON Session (4 Phases)

The RON Session page (/ron-session) implements a full Ohio-compliant Remote Online Notarization workflow with four sequential phases.

Phase 1: Session Setup

The notary initiates the session by:

1. Selecting a video conferencing platform from 8 supported providers (Zoom, Google Meet, Microsoft Teams, NotaryCam, Notarize, SIGNiX, DocVerify, Pavaso).

2. Sharing the session link with the signer.

3. Verifying audio/video connectivity.

4. Starting the session recording (required by Ohio law).

> ℹ *Recording consent must be explicitly acknowledged by all parties before proceeding. The e-sign consent component enforces this gate.*

Phase 2: Identity Verification & KBA

Two-part identity verification process:

A) Document-based ID verification — The signer presents a valid government-issued photo ID. The system accepts 12 ID types:

Accepted ID Types
Driver's License
State ID Card
US Passport
US Passport Card
Military ID (CAC)
Permanent Resident Card
Employment Authorization (EAD)
NEXUS Card
SENTRI Card
Global Entry Card
Tribal ID
Foreign Passport + Visa

B) Knowledge-Based Authentication (KBA) — The signer answers 5 personal identity questions generated from public records. Requirements per Ohio ORC §147.64:

• Minimum 4 of 5 correct answers required (80% threshold)

• Maximum 2 attempts allowed

• Questions must come from at least 3 different categories

• Session is terminated if both attempts fail

Phase 3: Administer Oath

The notary administers the appropriate oath or affirmation based on the notarial act type:

Act Type	Oath Script
Acknowledgment	"Do you acknowledge that you signed this document willingly for the purposes stated therein?"
Jurat	"Do you solemnly swear (or affirm) that the contents of this document are true and correct to the best of your knowledge?"
Oath	"Do you solemnly swear to tell the truth, the whole truth, and nothing but the truth?"
Affirmation	"Do you solemnly affirm, under penalty of perjury, that the statements made are true and correct?"

Phase 4: Finalize

1. Apply the electronic seal (e-seal) to the document with cryptographic hash.
2. Create the notary journal entry with all session details.
3. Process payment via Stripe or record cash/check payment.
4. Generate the notarization certificate.
5. Upload completed documents to secure storage.
6. Send completion notification to signer.

10. Session Compliance (Ohio ORC §147.64-66)

The RON session enforces the following Ohio statutory requirements:

Requirement	ORC Reference	Implementation
Audio/Video Recording	§147.64(B)(1)	Recording consent gate before session start; session recording duration tracked
Signer Identification	§147.64(B)(2)	Government photo ID + KBA verification
KBA Authentication	§147.64(B)(3)	5-question KBA with 80% pass rate, 2-attempt limit
Tamper-Evident Seal	§147.64(B)(4)	Cryptographic hash-based e-seal with verification endpoint
Journal Entry	§147.64(C)	Automated journal entry with all required fields
Session Recording Retention	§147.66	10-year minimum retention of session recordings
Witness Availability	§147.64(D)	Remote witness capability for applicable documents
Inactivity Timeout	Best Practice	15-minute inactivity warning with session pause/terminate options

Part V: Client Portal

11. Portal Overview

The Client Portal (/portal) is a comprehensive 14-tab dashboard providing clients with full self-service capabilities.

Tab	Description	Key Features
Overview	Dashboard summary	Stats cards, recent activity, quick actions, onboarding checklist
Appointments	Appointment management	Upcoming/past list, cancel/reschedule, status tracking
Documents	Document vault	Upload (drag-drop + wizard), folders, search, preview, download
Chat	Staff messaging	Real-time chat with admin/notary, file attachments, read receipts
Payments	Payment history	Transaction list, receipts, Stripe integration
Reviews	Feedback submission	Star rating, NPS score, written comments
Services	Service catalog	Browse/search services, book from portal
Apostille	Apostille requests	Submit requests, track status, upload supporting docs
Correspondence	Email history	View sent/received correspondence with staff
Reminders	Document reminders	Set expiry alerts, notification preferences
AI Tools	AI tool access	56 AI-powered tools for document generation and analysis
Service Requests	Intake requests	Submit and track non-bookable service requests
Leads	Referral tracking	View referred leads and their status
Referrals	Referral program	Generate referral links, track rewards

Onboarding Checklist

New users see a guided onboarding checklist (PortalOnboardingChecklist component) with tasks: complete profile, upload first document, book first appointment, and verify identity.

Document Readiness Score

The DocumentReadinessScore component evaluates uploaded documents for notarization readiness, checking for: valid file format, file size limits, completeness, and required supplementary documents.

12. Portal Features

Document Upload

Two upload methods are available:

1. Drag-and-drop + file picker with document wizard (categorization, appointment linking)

2. QR-based mobile upload (/mobile-upload) — scan QR code from desktop portal to upload from phone camera

Appointment Management

Clients can view upcoming and past appointments, cancel appointments (with reason capture), and reschedule via the /reschedule/:confirmationNumber route.

Payment Processing

Stripe-integrated payment system using the PaymentForm component. Supports credit/debit cards via Stripe Elements. Payment intents are created via the create-payment-intent edge function.

AI Document Analysis

Clients can analyze uploaded documents using AI tools for content extraction, compliance checking, and risk assessment directly from the portal.

Part VI: Business Portal

13. Business Portal

The Business Portal (/business-portal) enables organizations to manage their notarization needs at scale.

Features

• Organization Profile: Business name, type, EIN, verification status

• Authorized Signers: Add/remove authorized personnel with roles

• Team Documents: Shared document vault for the organization

• Bulk Operations: Schedule multiple appointments for different signers

• Articles of Incorporation: Upload and verify business formation documents

• Member Management: Add team members with role-based access (admin, member, viewer)

Part VII: AI Tools & Document Services

14. AI Tools Hub (56 Tools)

The AI Tools Hub (/ai-tools) provides 56 professionally-designed AI tools organized into 5 categories. Each tool features a structured input form, AI-powered generation via the ai-tools edge function, and rich markdown output with copy/download capabilities.

View AI Tools Hub

Tool ID	Tool Name	Category	Description
contract-generator	AI Contract Generator	Documents & Generation	NDAs, SaaS, freelance, employment contracts
meeting-minutes	Meeting Minutes Synthesizer	Documents & Generation	Board/team/client meeting minutes
business-proposal	Business Proposal Writer	Documents & Generation	Industry-specific proposals with budgets
policy-generator	Policy Document Generator	Documents & Generation	HR, IT, compliance policies (ISO/SOC2/GDPR)
invoice-generator	Invoice & Quote Generator	Documents & Generation	Invoices, quotes, pro-forma, credit notes
tech-docs	Technical Documentation Writer	Documents & Generation	API docs, user manuals, SOPs
board-report	Board Report Generator	Documents & Generation	KPI dashboards, financial highlights
training-manual	Training Manual Creator	Documents & Generation	Training materials with quizzes
sop-generator	SOP Generator	Documents & Generation	Standard operating procedures
case-study	Case Study Writer	Documents & Generation	Customer success stories with metrics
whitepaper	Whitepaper Generator	Documents & Generation	Thought leadership content
job-description	Job Description Writer	Documents & Generation	Inclusive, DEI-conscious job posts
project-charter	Project Charter Generator	Documents & Generation	Formal project charters
api-docs	API Documentation Writer	Documents & Generation	REST API docs with endpoints
changelog	Changelog & Release Notes	Documents & Generation	Professional release documentation
sentiment-analyzer	Document Sentiment Analyzer	Analysis & Insights	Tone, sentiment, professionalism scoring
contract-risk	Contract Risk Analyzer	Analysis & Insights	Risky clauses, missing protections
financial-summarizer	Financial Report Summarizer	Analysis & Insights	Key metrics from financial docs
competitor-analysis	Competitor Analysis Report	Analysis & Insights	SWOT, market positioning
data-insight	Data Insight Extractor	Analysis & Insights	Trend analysis, anomaly detection

survey-analyzer	Survey Results Analyzer	Analysis & Insights	Theme extraction, statistical summaries
meeting-cost	Meeting Cost Analyzer	Analysis & Insights	Organizational meeting cost calculation
churn-risk	Churn Risk Analyzer	Analysis & Insights	Customer health scores, intervention strategies
pricing-strategy	Pricing Strategy Analyzer	Analysis & Insights	Market-based pricing recommendations
email-campaign	Email Campaign Writer	Communication	Marketing/drip email sequences
press-release	Press Release Generator	Communication	AP-style press releases
client-communication	Client Communication Drafter	Communication	Professional client emails
pitch-deck	Pitch Deck Script Writer	Communication	Investor pitch deck narratives
crisis-communication	Crisis Communication Plan	Communication	Crisis response templates
newsletter	Newsletter Writer	Communication	Engaging newsletter content
social-media-planner	Social Media Content Planner	Communication	Multi-platform content calendars
rfp-response	RFP Response Writer	Communication	Proposal responses to RFPs
gdpr-policy	GDPR Privacy Policy Generator	Compliance & Legal	GDPR-compliant privacy policies
audit-checklist	Audit Checklist Generator	Compliance & Legal	Industry-specific audit checklists
risk-register	Risk Register Creator	Compliance & Legal	Enterprise risk registers
compliance-gap	Compliance Gap Analyzer	Compliance & Legal	Framework gap analysis
dpa-generator	Data Processing Agreement	Compliance & Legal	GDPR data processing agreements
incident-report	Incident Report Writer	Compliance & Legal	Structured incident reports
brand-voice	Brand Voice Guide Creator	Creative & Strategy	Brand voice guidelines
market-research	Market Research Brief	Creative & Strategy	Structured research briefs
strategic-plan	Strategic Plan Writer	Creative & Strategy	3-5 year strategic plans
okr-generator	OKR Generator	Creative & Strategy	Objectives & Key Results frameworks
value-proposition	Value Proposition Canvas	Creative & Strategy	Customer segment canvases
ab-test-planner	A/B Test Planner	Creative & Strategy	Experiment design frameworks
user-persona	User Persona Generator	Creative & Strategy	Data-driven user personas
business-model-canvas	Business Model Canvas	Creative & Strategy	Complete BMC analysis
swot-deep-dive	SWOT Deep Dive	Creative & Strategy	Comprehensive SWOT analysis
product-roadmap	Product Roadmap Writer	Creative & Strategy	Quarterly product roadmaps
proposal-template	Proposal Template Builder	Creative & Strategy	Reusable proposal templates
executive-summary	Executive Summary Writer	Creative & Strategy	C-suite executive summaries
ohio-ron-certificate	Ohio RON Certificate	Compliance & Legal	Ohio notarial certificates
ohio-journal-drafter	Ohio Journal Entry Drafter	Compliance & Legal	Notary journal entries
ohio-acknowledgment-jurat	Ohio Ack/Jurat Generator	Compliance & Legal	Acknowledgment & jurat language

ron-session-summary	RON Session Summary	Compliance & Legal	Post-session documentation
notary-commission-checklist	Notary Commission Checklist	Compliance & Legal	Commission renewal guide
resume-analyzer	Resume Analyzer	Analysis & Insights	ATS compatibility and scoring

15. Standalone AI Tools & Document Services

AI Writer (/ai-writer)

General-purpose AI content generation tool for creating blog posts, articles, marketing copy, and other written content with style matching capabilities.

AI Extractors (/ai-extractors)

Document data extraction tool that uses AI to pull structured data from uploaded documents including names, dates, amounts, and key terms.

AI Knowledge Base (/ai-knowledge)

Interactive Q&A tool that can answer questions about uploaded documents, providing context-aware responses with source citations.

DocuDex Editor (/docudex)

Full-featured TipTap-based document editor with rich text formatting, tables, images, multi-page support, find & replace, headers/footers, watermarks, page templates, print preview, and export to HTML/PDF/DOC formats.

Grant Dashboard (/grants)

Grant writing tool with templates for various grant types (federal, state, foundation, corporate). Includes budget builders, narrative generators, and submission tracking.

Resume Builder (/resume-builder)

Interactive resume creation tool with multiple templates, AI-powered content suggestions, DOCX import via mammoth.js, and export capabilities.

Signature Generator (/signature-generator)

Digital signature creation tool offering drawn, typed, and uploaded signature options with customizable fonts, colors, and sizes.

Document Builder (/builder)

Template-based document creation system for generating standardized forms and documents from pre-built templates.

Document Digitization (/digitize)

OCR-powered document digitization service using the ocr-digitize edge function. Converts scanned documents and images to searchable, editable text.

Part VIII: Admin Panel

16. Admin Dashboard

The admin panel (/admin) features a sidebar navigation with 33+ items, accessible to users with admin or notary roles. The AdminDashboard component serves as the layout wrapper with the AdminOverview as the default index page.

Dashboard Overview Stats

The overview page displays: total appointments (today/week/month), pending documents, unread messages, revenue summary, recent activity feed, and status distribution charts.

Admin Sidebar Navigation (33 Items)

Group	Pages
Dashboard	Overview
Operations	Appointments, Availability, Clients, Business Clients, Service Requests, Task Queue, Process Flows
Documents	Documents, Templates & Forms, DocuDex Pro, Content Workspace
Notary	Journal, Apostille, Compliance Report
Financial	Revenue, Performance
Communication	Live Chat, Email Management, Client Emails, Mailbox, Automated Emails, Lead Portal, CRM Hub
System	Team, Users, Services Editor, Audit Log, Settings, Webhooks, Integrations, Build Tracker, AI Assistant, Resources

17. Admin Operations

Appointments Management (/admin/appointments)

Comprehensive appointment management with filtering by status, date range, service type, and notary. Features include: status updates (pending → confirmed → in-progress → completed), notary assignment, admin notes, bulk actions, calendar view, and session recording links.

Availability Management (/admin/availability)

Configure available time slots for booking. Set regular hours, block specific dates, define buffer time between appointments, and manage holiday schedules.

Documents Management (/admin/documents)

Review and manage all client-uploaded documents. Features include status management (pending → approved → rejected), bulk document upload, version tracking, and document tagging.

Templates & Forms (/admin/templates)

Manage the form library with upload, categorization, and search. Templates are stored in Lovable Cloud storage and can be downloaded by clients from the /templates page.

Apostille Tracking (/admin/apostille)

Track apostille requests through the full lifecycle: received → processing → submitted to Secretary of State → completed → shipped. Includes tracking numbers, shipping labels, and fee management.

Journal Entries (/admin/journal)

Ohio-compliant notary journal with required fields: date, type of notarial act, document title, signer name, signer address, ID type, ID details, and notary signature. Supports search, export, and compliance reporting.

Revenue Dashboard (/admin/revenue)

Financial analytics including: total revenue (daily/weekly/monthly/yearly), revenue by service type, payment method breakdown, refund tracking, invoice generation, and CSV export.

Compliance Report (/admin/compliance-report)

Monthly compliance reporting for Ohio notary requirements. Generates reports covering journal completeness, recording retention, seal usage, and continuing education status.

18. Communications & CRM

Email Management (/admin/email-management)

IONOS email integration for sending and receiving emails. Features include: compose with rich text, email templates, reply/forward, attachment support, and send queue management via the process-email-queue edge function.

Lead Portal (/admin/leads)

5-stage lead pipeline: New → Contacted → Qualified → Proposal Sent → Converted/Lost. Features include: lead source tracking, automated follow-up sequences, lead scoring, bulk import, and AI-powered lead proposal generation.

CRM Hub (/admin/crm)

7-stage deal pipeline with Kanban board view: Prospecting → Qualification → Proposal → Negotiation → Closed Won/Lost/On Hold. Includes deal value tracking, activity logging, contact management, and HubSpot sync capability.

Live Chat (/admin/chat)

Real-time messaging with clients using the chat_messages table with realtime subscription. Features: message threading, file attachments, read receipts, and notification badges.

Mailbox (/admin/mailbox)

IONOS IMAP email sync via the ionos-email-sync edge function. Displays synced emails in a familiar inbox UI with folders, search, starring, and lead extraction from incoming emails.

19. Admin System

Team Management (/admin/team)

Manage notary staff with role assignment, commission tracking, and performance metrics. Supports notary recruitment via the /join page.

User Management (/admin/users)

Admin-only page for managing all platform users. Features: role assignment (client/notary/admin) via the user_roles table, account status management, and user creation via the admin-create-user edge function.

Audit Log (/admin/audit-log)

Comprehensive activity audit trail recording all significant platform actions: login events, document uploads, appointment changes, payment processing, admin actions, and compliance-related activities. Filterable by user, action type, date range, and entity.

Build Tracker (/admin/build-tracker)

Development progress tracking tool with AI analyst capabilities. Features: bug/feature tracking, gap analysis, brand analysis, page auditor, live preview, service flow mapping, theme explorer, and plan history.

Settings (/admin/settings)

Platform-wide configuration including: pricing rules, compliance settings, integration credentials (Stripe, IONOS, SignNow, HubSpot), notary seal configuration, email templates, and branding options.

Webhooks (/admin/webhooks)

Configure and manage webhook endpoints for external integrations. Supports Stripe webhooks (stripe-webhook), SignNow webhooks (signnow-webhook), and custom webhook configurations.

Part IX: Edge Functions & Integrations

20. Edge Functions Reference (47 Functions)

All server-side logic runs as Lovable Cloud edge functions, deployed automatically. Functions are organized by domain:

Function Name	Domain	Description
admin-create-user	Auth	Creates new user accounts with specified roles (admin use only)
auth-email-hook	Auth	Custom email hook for branded auth emails (signup, reset, magic link)
ai-tools	AI	Unified AI tool runner for all 56 AI Tools Hub tools
ai-batch-process	AI	Batch processing of multiple documents with AI analysis
ai-compliance-scan	AI	Automated compliance scanning of documents against rule sets
ai-cross-document	AI	Cross-document analysis and comparison
ai-document-review	AI	AI-powered document review with findings and scoring
ai-extract-document	AI	Structured data extraction from documents
ai-schedule-optimizer	AI	AI-powered appointment schedule optimization
ai-style-match	AI	Style profile matching for consistent writing
build-analyst	AI	AI analyst for the Build Tracker feature
client-assistant	AI	Client-facing AI chat assistant
notary-assistant	AI	Notary-specific AI helper for compliance questions
detect-document	AI	Document type detection and classification
explain-document	AI	Plain-language document explanation
ionos-email	Email	Send emails via IONOS SMTP
ionos-email-sync	Email	Sync emails from IONOS IMAP to email_cache table
process-email-queue	Email	Process queued transactional emails with rate limiting
process-inbound-email	Email	Handle incoming webhook emails
send-correspondence	Email	Send and log client correspondence
extract-email-leads	Email	Extract lead information from incoming emails
send-appointment-emails	Notifications	Appointment confirmation/update emails
send-appointment-reminders	Notifications	Scheduled appointment reminder emails
send-document-notification	Notifications	Document status change notifications
send-followup-sequence	Notifications	Automated follow-up email sequences
send-sms-reminder	Notifications	SMS appointment reminders (Twilio)
send-welcome-sequence	Notifications	New user welcome email sequence
create-payment-intent	Payments	Create Stripe payment intent for checkout
get-stripe-config	Payments	Return publishable Stripe key to client
stripe-webhook	Payments	Handle Stripe webhook events (payment success, refunds)
process-refund	Payments	Process payment refunds via Stripe
export-document	Documents	Export documents in various formats
ocr-digitize	Documents	OCR processing for scanned documents

scan-id	Documents	ID document scanning and data extraction
translate-document	Documents	AI-powered document translation
submit-lead	CRM	Public lead submission endpoint
fetch-leads	CRM	Retrieve and filter leads
discover-leads	CRM	AI-powered lead discovery from web sources
generate-lead-proposal	CRM	AI-generated proposals for leads
scrape-social-leads	CRM	Social media lead scraping
hubspot-sync	CRM	Bi-directional HubSpot CRM sync
signnow	Sessions	SignNow e-signature API integration
signnow-webhook	Sessions	Handle SignNow webhook events
assign-task	Sessions	Assign tasks to team members
google-calendar-sync	Calendar	Google Calendar bi-directional sync
health-check	System	Platform health monitoring endpoint

Database Tables Reference

The platform uses the following database tables for data storage:

Table	Purpose
profiles	User profiles with name, phone, address, plan, commission details
user_roles	Role assignments (admin, notary, user) with security definer function
appointments	Booking records with all scheduling and status fields
documents	Uploaded documents with status tracking and hashing
document_versions	Version history for documents
document_tags	Tags/labels for document organization
document_reminders	Expiry date alerts for documents
document_reviews	AI review findings and scores
document_collections	User-created document folders
document_bundles	Pre-configured document packages
payments	Payment records with Stripe integration
leads	Lead pipeline with source tracking and scoring
lead_sources	Configured lead generation sources
deals	CRM deal pipeline with stages and values
chat_messages	Client-staff messaging
client_correspondence	Email correspondence log
client_feedback	Client ratings and NPS scores
audit_log	Comprehensive activity audit trail
e_seal_verifications	E-seal records with cryptographic hashes
session_tracking	RON session status tracking
apostille_requests	Apostille processing pipeline
business_profiles	Organization accounts
business_members	Org team members
business_roles	Org role assignments
service_requests	Intake-only service submissions
services	Service catalog with pricing and configuration
email_cache	Synced IONOS emails
email_drafts	Saved email drafts
email_send_log	Email delivery tracking
email_signatures	Custom email signatures
booking_drafts	In-progress booking data
appointment_emails	Appointment notification log
fee_adjustments	Manual fee adjustment records
compliance_reports	Monthly compliance report data
compliance_rule_sets	Configurable compliance rules
form_library	Uploaded template forms
content_posts	Blog/content workspace posts

build_tracker_items	Development tracking items
build_tracker_plans	Development plan records
continuing_education	Notary CE credit tracking
grants	Grant writing projects
grant_templates	Grant document templates
resumes	Resume builder projects
cover_letters	Cover letter projects
client_style_profiles	AI writing style profiles
crm_activities	CRM activity log
admin_saved_filters	Saved admin filter presets

Security & Authentication

The platform implements multiple security layers:

Security Feature	Implementation
Authentication	Email/password via Lovable Cloud Auth with session persistence
Role-Based Access	user_roles table with security definer function (has_role)
Route Protection	ProtectedRoute component with requireAdmin and adminOnly flags
Row-Level Security	Postgres RLS policies on all tables
CSRF Protection	Custom CSRF token generation and validation
Input Sanitization	DOMPurify for HTML, Zod for API validation
Rate Limiting	Edge function rate limiting and email send throttling
Audit Logging	Comprehensive audit trail for all significant actions
Content Security	Strict CSP headers, XSS prevention
Session Management	JWT-based sessions with auto-refresh, 15-min timeout warnings

Third-Party Integrations

Integration	Purpose	Configuration
Stripe	Payment processing	STRIPE_SECRET_KEY, STRIPE_WEBHOOK_SECRET in secrets
IONOS	Email (SMTP/IMAP)	IONOS_EMAIL_ADDRESS, IONOS_EMAIL_PASSWORD, IONOS_SMTP_HOST
SignNow	E-signatures	SIGNNOW_API_KEY, SIGNNOW_CLIENT_ID
HubSpot	CRM sync	HUBSPOT_ACCESS_TOKEN in secrets
Google Calendar	Calendar sync	Google OAuth via google-calendar-sync function
Twilio	SMS reminders	TWILIO_ACCOUNT_SID, TWILIO_AUTH_TOKEN, TWILIO_PHONE_NUMBER
Resend	Fallback email	RESEND_API_KEY for email delivery fallback

Glossary of Terms

Term	Definition
RON	Remote Online Notarization — notarization conducted via audio-video technology
KBA	Knowledge-Based Authentication — identity verification using personal history questions
E-Seal	Electronic notary seal with cryptographic tamper-evident properties
ORC	Ohio Revised Code — the statutory laws of Ohio
Jurat	Notarial act where signer swears/affirms content is true and signs in notary's presence
Acknowledgment	Notarial act where signer acknowledges voluntary signing
Apostille	International authentication of a notarized document under the Hague Convention
RLS	Row-Level Security — database access control at the row level
Edge Function	Serverless backend function that runs on Lovable Cloud infrastructure
SaaS	Software as a Service — web-based tool accessed via subscription
